

Wangyang Lin

LIN Wangyang is an art-design and environmental-design researcher whose work connects post-occupancy evaluation of urban built environments, urban environment and mental health, virtual environments, player motivation typology and multi-criteria decision making.

He has practical design experience across resort hospitality, exhibition spaces, school anniversary installations, community center renovation and rural renewal projects. His work links design research, spatial experience, public health communication and evidence-based evaluation.

Research and practice interests: multi-criteria decision making; post-occupancy evaluation; urban built environments; urban environment and mental health; virtual environments; player motivation; exhibition and community-space design.

M.A. Art Design, Guangzhou Academy of Fine Arts

B.A. Environmental Design, Wuhan University of Science and Technology
